

How to pair RC-5 with PS?

Note: Following procedure is done once and does not have to be repeated each time units are on (unless you change total station).

Keywords

PS Series, RC-5

Setting up PS

1. Power on PS and in main screen select **CONFIG**
2. Chose option number 5 – **COMMS**
3. In **COMMS SETUP** tab select **BLUETOOTH** as Comms mode
4. To save settings press OK in the same screen

Setting up RC-5

1. While PS powered on and running with settings mentioned earlier, power on RC-5 while holding **SEARCH** button down
2. As a result of a previous step **FAR led** will start to flash indicating searching for Bluetooth devices is in progress. **NOTE:** to speed up search process be sure there are almost none visible Bluetooth devices in range.
3. Indication that RC-5 found PS is that COM LED1 and FAR led are both on continuously and on PS's main screen you see total station icon with green antenna up
4. If previous statement is true then press FAR button to confirm pairing to PS. RC-5 powers off itself. Otherwise proceed with next step.
5. Press **SEARCH** button which will tell RC-5 to continue looking for next Bluetooth device. Continue search till on PS screen you see total station icon with green antenna up. Confirm pairing by pressing FAR button.
